Network Solutions

Structured Cabling Solution

TCS is specialized in structured cabling system provides a platform upon which an overall information system strategy is built. We design and build flexible cabling infrastructures nationwide - structured cabling systems that support multiple voice, data, video and multimedia systems regardless of their manufacturer. We are a "one stop shop" for all your organization network infrastructure needs. We will help you evaluate, design and install the optimum integrated system for your company.

Fiber Optic

TCS carries out the design, installation, testing & maintenance of Fiber Optic systems including Termination/Splicing of all fiber cables & repair work.

Our Fiber Optic termination and testing service is offered to corporate end users as well as other communication providers who prefer to use our skilled services rather than invest in expensive test equipment and costly engineer training. Both methods of termination are offered either direct termination or fusion splicing of pre-manufactured pigtail assemblies

Our services include the following:

Site Survey/Design & Installation /Cable Pulling with EMT/PVC Pipes and Conduits/Termination of UTP and Fiber Optic/Testing and Certifications, Installation of Wall-mount and Freestanding Cabinets and Racks cable organizing and Labeling
